Professor Dr. Phoebe Koundouri is a globally renowned mathematical economist who has pioneered human-centered, interdisciplinary modelling systems for the sustainable interaction between nature, society, and the economy. She brings nearly 30 years of academic leadership and research excellence at leading institutions, including the University of Cambridge, University College London (UCL), the London School of Economics (LSE), the University of Reading, and the Technical University of Denmark. She is consistently ranked among the top 2% of world scientists in multiple prestigious international listings, with an academic record that includes 21 books, more than 800 published papers, over 100 large-scale research projects, and measurable impact in more than 120 countries.

She is currently Professor at the School of Economics, Athens University of Economics and Business (AUEB); Visiting Professor at the Department of Earth Sciences, University of Cambridge; and Senior Research Fellow at Peterhouse, University of Cambridge—her alma mater. She is the Founder of the Alliance of Excellence for Research and Innovation on Aeiphoria (AE4RIA), a global research and innovation network bringing together more than 200 researchers. AE4RIA is anchored in ReSEES.AE4RIA at AUEB and SDU.AE4RIA at the ATHENA Information Technology Research Center, both research centers directed by Professor Koundouri.

In 2025, she was invited by the UN Secretary-General to co-chair the 2027 United Nations Global Sustainable Development Goals Report. She serves on the Nominating Committee for the Nobel Prize in Economic Sciences and is an elected Fellow of several distinguished academies, including Academia Europaea; the World Academy of Art and Science (WAAS), where she also serves as Trustee; the European Academy of Sciences and Arts; the Academy of Engineering and Technology of the Developing World; and the InterAcademy Partnership (IAP). She is also a Fellow of leading scientific associations, including the European Association of Environmental and Resource Economists (EAERE) and the European Forest Institute. Her scientific distinctions include the prestigious European Research Council (ERC) Synergy Grant; the Academy of Athens Award for Excellence in Science—awarded only once every four years; and the Award of Excellence of the Republic of Cyprus, conferred by the Academy of Sciences, Letters and Arts of the Republic of Cyprus.

Professor Koundouri serves as Chair of the World Council of Environmental and Natural Resource Economists Associations and is former President of the European Association of Environmental and Resource Economists. She is Chair of the United Nations Sustainable Development Solutions Network (SDSN) Global Climate Hub and Co-Chair of SDSN Europe. She advises numerous multilateral institutions and national governments worldwide. She is a member of the European Investment Bank Climate Leaders Network, a co-author of the Lancet COVID-19 Commission, and a contributor to the Pontifical Academy of Social Sciences project “Financing for Development in the Jubilee Year 2025.” She also serves as an Ambassador for the European Research Council (ERC) and was named World Ambassador of Happiness and Peace in 2022, a distinction conferred by the Government of India at the House of Lords in London.

SHORT BIO

Prof. Dr. Phoebe Koundouri is a globally renowned mathematical economist who has pioneered human-centered, interdisciplinary modelling systems for the sustainable interaction between nature, society, and the economy. She combines nearly 30 years of academic leadership and research excellence with institution-building, global policy influence, and real-world implementation. Her work connects climate, water, energy, land, biodiversity, technology, finance, governance, and human behaviour through an end-to-end architecture: science - stakeholder co-design - transformation pathways - finance-governance - implementation. She is a Professor at the School of Economics at the Athens University of Economics and Business; Visiting Professor at the Department of Earth Sciences at the University of Cambridge and Senior Research Fellow at Peterhouse, University of Cambridge. From 2022 to 2025, she served as a Research Professor at the Department of Technology, Management and Economics, Technical University of Denmark (DTU). Between 1997-2007 she held academic positions at the University of Cambridge, University College London, University of Reading, London School of Economics and Politics. Prof. Koundouri holds an MPhil and a PhD in Economics from the Faculty of Economics and Politics, Department of Economics, University of Cambridge. For her studies she received a full scholarship from the University of Cambridge and the Cambridge Commonwealth Trust.

She is listed among the most-cited women economists globally, included in Stanford University's list of the top 2% of scientists worldwide, and serves as a member of the Nominating Committee for the Nobel Prize in Economics. She has published 21 monographs and edited books, more than 800 scientific papers (and 200 articles in public press) in the following fields of research: Economics and Econometrics, Mathematics, Statistics, Social Sciences, Environmental Sciences, Geosciences, Interdisciplinary and Transdisciplinary Science, Systems Innovation and Stakeholders Co-design Approaches, Philosophy of Science, including publications in Nature, the Lancet, and top-ranked economics, econometrics, and sustainability science journals. Prof. Phoebe Koundouri is ranked among the top 1% Economists in the Field of Environmental Economics, top 1% Female Economists, top 1% Economists in Greece, top 2% Economists in the European Union and top 2% Economists in Europe

Professor Koundouri is an elected Fellow of distinguished academies and scientific bodies including Academia Europaea; the World Academy of Art and Science (WAAS), where she also serves as Trustee; the European Academy of Sciences and Arts; the Academy of Engineering and Technology of the Developing World; the InterAcademy Partnership (IAP); the European Association of Environmental and Resource Economists (EAERE); the European Forest Institute and the International Science Council (ISC).

In 2025, she was invited by the UN Secretary-General to serve as **Co-Chair of the Independent Group of Scientists preparing the UN Global Sustainable Development Report 2027**, placing her at the highest global science-policy interface. In the multilateral world, she brings rigorous systems science into collective decision-making, creating shared evidence, a common language, and transformation pathways that allow governments,

international organizations, business, finance, and civil society to act together across countries and sectors. In 2019, she was elected President of the European Association of Environmental and Resource Economists (EAERE), the biggest scientific association in the field, with more than 1500 member institutions, from more than 75 countries. Now she is the President of the World Council of Environmental Resource Economists Association, including the USA, the Latin American, the European, the African, the Asian and the Oceanian Associations of Environmental and Resource Economists, with many thousands of member scientists from more than 160 countries.

In 2020 she received the prestigious European Research Council ERC Synergy Grant, "Smart Water Futures: Designing the Next Generation of Urban Drinking Water Systems". In 2023, she received the Academy of Athens Excellence in Science Award for her contribution to the advancement of the Science of the Marine Environment. In 2025, she received the Award of Excellence of the Republic of Cyprus, conferred by the Academy of Sciences, Letters and Arts of the Republic of Cyprus. In 2022, she was also named World Ambassador of Happiness and Peace, a distinction conferred by the Government of India at the House of Lords in London. Moreover, over the last three decades, she has received academic excellence awards including the EAERE ERC Award of scientific excellence, best paper awards in conferences and journals, paper with the greatest impact on policy making, etc; and she has delivered keynote speeches and high-level policy addresses across all continents and at major international fora.

Professor Koundouri is the founder and scientific director of the Alliance of Excellence for Research and Innovation on Aeiphoria (AE4RIA), a global research and innovation network which anchored in ReSEES.AE4RIA at the Athens University of Economics and Business and SDU.AE4RIA at the ATHENA Information Technology Research Center, both research centers directed by Professor Koundouri. AE4RIA includes a broad ecosystem of research institutions, international academic collaborators, innovation accelerators, science-policy bodies, and global scientific academies and associations. AE4RIA brings together a multidisciplinary team of over 200 researchers, including economists, mathematicians, statisticians, engineers, earth scientists, social scientists, and lawyers, and mobilizes a global ecosystem of more than 20,000 members with a presence in more than 120 countries. Since 1997, Prof. Koundouri has coordinated and supervised more than 100 interdisciplinary research projects on sustainability issues across the world, supported by significant competitive research funding. The portfolio spans: Climate Neutrality and Resilience, Sustainable Seas and Oceans, Water Food Energy Biodiversity Nexus and Land Use, Innovation Accelerators, Sustainable Finance and Behavioral Economics, Education and Up-Skilling, Global Initiatives, AE4RIA Living Labs (over 70 stakeholder living labs across the world) AE4RIA - 360 info Policy Briefs Series, AE4RIA AI SDGs, AE4RIA AI SKILLS.

Prof. Koundouri is Editor, Elements Book Series in Environmental and Resource Economics and Development, Cambridge University Press, Co-Editor, Environmental and Resource Economics (Official Journal of EAERE) Springer Nature, Associate Editor, Nature: Climate Action Nature Portfolio Journal, Springer Nature, Associate Editor, Annual Reviews of Resource Economics, Senior Editor, Cambridge Prisms: Water, Cambridge University Press, Field Chief Editor, Frontiers in Environmental Economics. She is (was) also associate editor and/or editorial board member in more than 30 academic journals (including Water Resources and Economics, Environment and Development Economics, Economics-ejournal).

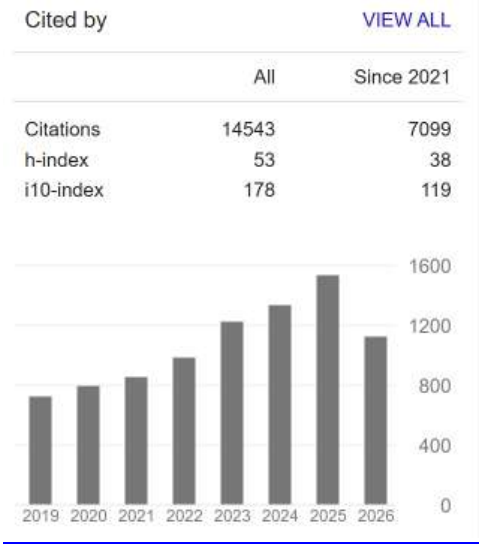

She is Academia Europaea Representative to S20 Task Force 2 on Bioeconomy of the G20 Heads of States, Commissioner for the Lancet Commission on COVID-19 Recovery, and a

member of the Fraternal Economy of Integral and Sustainable Development of the Pontifical Academy of Social Sciences. She is also a member of the European Investment Bank Climate Leaders Network and the Leading Women for the Ocean (LWO); She is a Member of the National Board for Research and Innovation (NBRI) of Cyprus, a member of the Special Scientific Committee on Climate Change of the Greek Ministry of Environment and Energy, and its representative in the International Climate Councils Network (ICCN). She is a member of the Regional Action on Climate Change International Advisory Committee (RACC-IAC) associated with the STS Forum; EU Climate Pact Ambassador; and EAERE observer for the 7th Assessment Report of the Intergovernmental Panel for Climate Change (IPCC) and scientific stakeholder to IPCC Special Report on Climate Change and Cities; and Ambassador for the European Research Council (ERC). Professor Koundouri is an advisor to the European Commission, World Bank, EIB, EBRD, OECD, UN, NATO, WHO, numerous national and international foundations and organizations, as well as national governments.

She has supervised more than 30 PhD students, more than 20 open-access training programmes, reaching over 15,000 learners across 165+ countries, organized more than 100 prestigious international conferences, workshops, summer schools and training courses, including the annual conference of the European Association of Environmental and Resource Economists in 2017, with more than 1000 participants.

Professor Phoebe Koundouri's unique footprint lies in her rare ability to turn scientific excellence into systemic change at global scale—bridging disciplines, co-designing solutions with stakeholders, and translating evidence into implementable and financeable transformation pathways, with impact across more than 120 countries.

REASEARCH STATEMENT

"Professor Phoebe Koundouri is an internationally distinguished frontier scientist whose work pushes the boundaries of traditional disciplines, integrating mathematical economics, natural and environmental sciences, artificial intelligence, and complex systems science to address some of humanity's most pressing challenges. Her scientific uniqueness lies in her ability to bridge disciplines, develop innovative theoretical and methodological frameworks, and translate cutting-edge research into actionable pathways for sustainable development. Through her leadership of major international research initiatives and interdisciplinary scientific networks, she advances the science–policy–society interface, connecting scientific discovery with evidence-based policymaking, institutional transformation, innovation, finance, and societal engagement. Her overarching ambition is to transform scientific excellence into systemic change, advancing human well-being across generations while safeguarding and regenerating the Earth's natural systems.

Her scientific uniqueness lies in breaking disciplinary silos and transforming frontier research into systemic solutions at the science–policy–society interface. She is the Founder and Scientific Chair of AE4RIA (Alliance of Excellence for Research and Innovation on Aeiphoria), a global interdisciplinary research and innovation alliance bringing together over 250 researchers, more than 100 competitively funded research projects (over 500 M), and activities spanning over 120 countries, supported by more than 70 Living Labs that connect scientific research with stakeholders and real-world transformation. Through AE4RIA, she has built a powerful international ecosystem connecting scientific excellence with evidence-based policymaking, technological innovation, entrepreneurship, sustainable finance, and societal engagement. Her work demonstrates how frontier science can move beyond academic discovery to shape policies, mobilize investment, and deliver measurable economic, environmental, and social impact".

I am a mathematical economist and econometrician focused on sustainable development. My work focuses on developing innovative, human-centric, interdisciplinary systems for the sustainable interaction between nature, society, and the economy.

My research focuses on the integration of interdisciplinary systems science, decision theory, mathematical economic modelling, behavioral experimental approaches and econometrics, for the development of robust models of human decision-making processes over time and under uncertainty, for understanding the determinants of the total economic value (including use and passive values) of public goods and services, as well as the values of global externalities like climate change. These values are integrated in transformational policy making, that supports and sustains intergenerational human welfare. As time and uncertainty are correlated, and uncertainty often takes the form of ambiguity (when probabilities of uncertain events are unknown) I work on a unifying framework, for short, medium and long run decision-making under uncertainty and ambuiguity. Below the research and innovation projects I currently supervise, under AE4RIA, per thematic priority:

Climate Neutrality and Resilience
Sustainable Seas and Oceans
Water Food Energy Biodiversity Nexus and Land Use
Innovation Accelerators

Sustainable Finance and Behavioral Economics
Education and Up-Skilling
Global Initiatives
AE4RIA - 360 info Policy Briefs Series
AE4RIA AI SDGs
AE4RIA AI SKILLS

More technically, I work towards: (a) improving the real world relevance of the mathematical (theoretical) models focused on capturing the total economic value of natural assets (goods and services) and ecosystem processes (mainly by incorporating dynamic, intergenerational, spatial, risk, uncertainty, ambiguity elements, informed by interdisciplinary systems approaches), (b) improving the link between theoretical and empirical models on deriving the total economic value, by homogenising their mathematical and statistical underpinning, (c) improving econometric methods for estimating applied models and integrating AI and ML approaches, (d) incorporate the derived empirical estimates in the implementation of natural resource cost-benefit analysis, to inform policy design and implementation.

My proposed research at Earth Science Department University of Cambridge, aims to deepen and expand integrated, interdisciplinary and intradisciplinary methodologies for designing climate neutrality and ecosystems resilient systems pathways, with a focus on embedding them within socio-economic, financial, and governance systems, building on my leadership of the SDSN Global Climate Hub (GCH).

The Global Climate Hub (GCH) is operating as an UN Sustainable Development Solutions Network Thematic Network and works under the auspices of the UN Secretary-General to mobilize the world's universities, think tanks, and national laboratories for action on the Sustainable Development Goals (SDGs) and the Paris Agreement; empower societies through free online education; and translate scientific evidence and ideas into solutions and accountability. The GCH's mission is to produce national and international systems integrated solution pathways, towards climate neutrality and climate resilience, embedded in socio-economic-finance systems and supported by stakeholder co-design participatory processes.

The SDSN Global Climate Hub (GCH) provides science-based recommendations for combating the climate crisis and preventing further deterioration. It uses extensive data, knowledge, and technologies provided by experts in various fields to implement country-specific action plans to be adopted and reinforced by society. The 9 Units of the SDSN GCH represent the simultaneous advancements that a country should go through to achieve the design and implementation of detailed climate neutrality and climate resilience pathways. The first unit of the GCH on Data, Platforms and Digital Applications, focuses on AI-ready research in data aggregation, connection and visualization, for improved understanding of processes and research practices and support the research of all other units. The second unit on Atmospheric Physics, Climatology and Earth Sciences, focuses on research in global and regional climate change, IPCC's scenarios and projections, downscaling, extreme phenomena, and air pollution. The third unit on Systems Land-Water-Food-Biodiversity-Land Use-Marine Use Nexus Modelling, focuses on research in land-use, water, food, biodiversity, and marine-use systems, their changes and interactions, aiming to their sustainable, climate-neutral and

economically viable management. The fourth unit on research in Energy Systems & Emissions Modelling, focuses on simulation of energy supply and demand, renewable energy pathways, greenhouse gas (GHG) emissions from all sectors, aiming to clear-energy efficiency, and cross-sectoral climate-neutrality/ decarbonization. The fifth unit on research in Climate, Environment and Health, focuses on research in health implications of climate change, natural and extreme phenomena, socio-economic assessments, and future pathways with a focus on interventions. The sixth unit on Climate Innovation Acceleration, focuses on research in partnerships among the academic, public, business, and technology sectors, to co-develop, incubate and accelerate to the market solutions for a green, sustainable economy. The seventh unit on Socioeconomic Analysis focuses on research in computable general equilibrium modelling and impact assessment models for estimating social, economic and policy facets of the sustainability transition, ensuring fairness, inclusivity and equity. The eight unit on Transformative and Participatory Approaches focuses on research in mobilizing community and policy dialogue to suggest policies customized in the lived realities of those they impact. The ninth unit focuses on education, training, upskilling and reskilling for the development of educational and training programs to assist the work-force's climate sustainability transformation. The approach we use is simultaneously inter and intra dscipliplinary, pioneering cutting edge integration of mathematical systems science, computable general equilibrium analysis and stakeholders' systems innovation approaches, for providing national and regional solution pathways for direct implementation for the achievement of sustainability as defined by the 17 Sustainable Development Goals. The approach is original and innovative, and urgently needed for developing welfare supporting pathways to sustainability that are holistic and implementable.

My research also includes **Sustainable Finance and Innovation for Mitigation Transitions** and centers on directing investments into innovative solutions that support mitigation efforts. By employing advanced econometric and dynamic models, computable general equilibrium models and impact assessment models, I explore long-term cost-benefit analysis under uncertainty, facilitating the transition towards low-carbon economies. My interdisciplinary research integrates human decision-making insights with financial modeling, fostering new market mechanisms to finance sustainable innovations and accelerate practical solutions for climate change mitigation. Moreover, my research includes **Sustainability Socio-Economics Policy Analysis and Governance** focusing on the design and implementation of sustainability strategies, emphasizing transparent, effective governance and international cooperation. This expertise is backed up by many years of experience and engagement with policymakers worldwide, including many multilateral institutions. By combining economic modeling with qualitative assessments, I design and evaluate policies that underpin climate resilience and sustainable development, shaping frameworks that support interdisciplinary approaches to natural resource management and global environmental challenges.

AE4RIA Three-Step Approach for "A Global Commons for SDGs Implementation": the Backbone of the United Nations Global Sustainable Development Report 2027

The SDSN Global Climate Hub (GCH), which is **AE4RIA: Alliance of Excellence for Research and Innovation on Aephoria - United Nations Sustainable Development Solutions Network**

anchored, interdisciplinary initiative that couples advanced AI-ready data infrastructure, interdisciplinary mathematical and statistical models, transdisciplinary stakeholder engagement, training and co-design methods, can be read in this chapter as one illustrative example of such an approach. Framed in this way, the GCH is not presented as the solution to all sustainable development challenges, but as a concrete example of the broader kind of systems-oriented practice that the 2027 context increasingly demands.

To achieve that, the GCH approach involves 3 stages (Fig.1): i) continuous monitoring of systemic pressures and vulnerabilities; ii) co-designed transition pathways that make synergies, trade-offs, and distributional implications explicit; iii) and financing and governance arrangements capable of moving from analysis to delivery. The three-step framework proposed here is intended in exactly this sense: not as a solution to everything, but as an operational approach that can fully address some implementation gaps, partially address others, and help governments act more strategically even where major external pressures, such as war and geopolitical instability, remain beyond the reach of modelling alone.

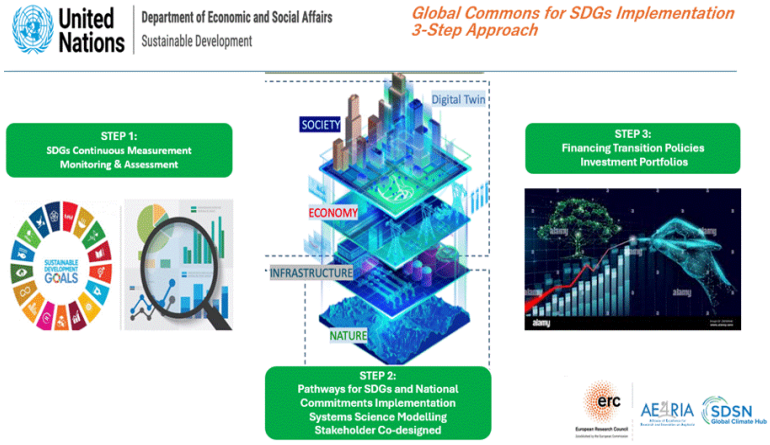

Figure 1 – The 3-step framework.

First stage: Continuous monitoring and assessment. The objective is to build a rigorous evidence base that is spatially explicit, temporally consistent, and policy-relevant. This is achieved by harmonizing observational and administrative data, remote sensing layers, socio-economic statistics and infrastructure inventories; performing baseline diagnostics of resource stocks, vulnerabilities, and hotspots; and developing digital twins and quality-assured data pipelines to feed models. The output is a policy-use-ready interactive baseline dashboard, hotspot maps, and risk matrices that identify priority interventions, inform resource allocation, and shortlist policy levers for immediate action (Lafortune et al., 2024).

Second stage: Science-based transformational pathways for SDG implementation. We convene stakeholders in living labs to define objectives, constraints and plausible narratives; run coupled modelling chains - including spatial land-use, water risk, marine use, energy system simulation and optimization, and economy-wide assessments - with scenario ensembles; and evaluate synergies, trade-offs, and distributional outcomes across SDG indicators. In this way, pathways are co-produced that are technically feasible, economically realistic, and socially acceptable. The output is a portfolio of candidate transformation pathways across short-, medium-, and long-term horizons, together with quantified co-benefits and trade-off matrices, ranked policy packages, and investment road maps for

decision makers (Alamanos et al., 2022; Koundouri et al., 2024). Examples of how such integrated modelling can be used to stress-test national and regional transition plans are provided in the case-study boxes on Greece and Europe.

Third stage: Financing pathways and investment portfolios. Effective transformation requires aligned fiscal instruments, blended finance, and policy coherence, linking funding sources to priority measures and using compact key performance indicators to track progress. Yet progress is constrained by shrinking fiscal space and an unfair, short-term-oriented global financial system that is crisis-prone and exacerbates vulnerabilities in developing countries. This multi-crisis context highlights the urgent need to reform the global financial architecture and massively scale up affordable long-term finance by aligning all flows with the SDGs. In practice, this stage connects co-designed pathways to implementable financing strategies, adaptation investment plans, and mechanisms capable of scaling both mitigation and resilience while preserving fairness and inclusion.

The model is put into practice through integrating diverse datasets (geospatial/Earth observation, SCADA / IoT, socio-economic, real-time) into a centralized data space infrastructure, which supports a modeling ecosystem covering energy and transport system simulation and optimization, land-use dynamics and spatial downscaling, hydrological and water-risk assessments, and Beyond-GDP economy-wide welfare and trade outcomes via Computable General Equilibrium models, sustainable (beyond GDP) finance at global, regional, national, micro (companies and institutions) levels (Fig. 2). These models feed into the GCH platform, composed of interconnected DTs that simulate interactions across society, economy, infrastructure, and nature, enabling evidence-based scenario analysis and stakeholder-informed decision-making.

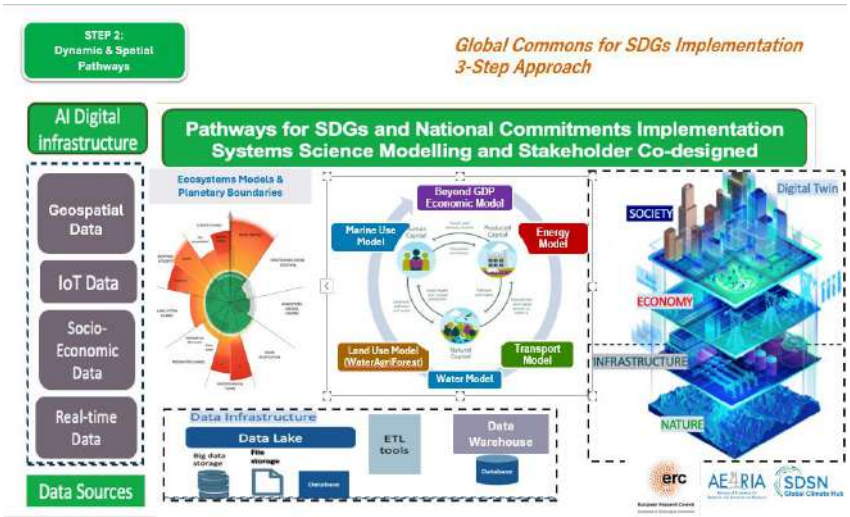

Figure 2 – The e-platform.

The overall GCH approach is operationalised as an interactive implementation loop that links evidence, stake-holder engagement and delivery (Fig. 5). The layered DT continuously updates the evidence base for exploring scenarios and policy packages, enforced by comprehensible and impactful geospatial visualizations. This evidence is translated into action through structured stakeholder co-design cycles that identify and prioritise the actors who can enable

change, align strategies around shared value, and agree measurable success criteria. These co-design cycles explicitly bring together national authorities, technical agencies, private value-chain and finance actors, and communities whose livelihoods depend on ecosystem services, to ensure that solution choices reflect real decision processes and locally grounded constraints. By institutionalising regular, evidence-based dialogue across countries and sectors, these cycles also function as a confidence-building mechanism that reduces geopolitical tension and supports peaceful co-operation. Implementation then proceeds through four mutually reinforcing transformation pathways: SDG monitoring and assessment, policy and governance reform, technology and capacity development, and fiscal/financial measures. In practical terms, these strands: (i) establish baselines and decision dashboards for tracking climate, biodiversity, resilience and inclusion outcomes; (ii) translate evidence into implementable instruments anchored in planning and budgeting cycles; (iii) deliver interoperable data/model operations together with targeted training so institutions can run and update the system; and (iv) connect verified results to investment logic, including risk-sharing and performance-linked mechanisms that can be adopted by public and private financiers. These pathways are designed to reinforce each other and are applied over time from local pilot sites to national scales, so that evidence, rules, skills and finance evolve together toward scalable solutions. Continuous monitoring and stakeholder feedback are used to refine data, models, strategies and financing arrangements over time, helping ensure that interventions remain climate-resilient, biodiversity-friendly and scalable.

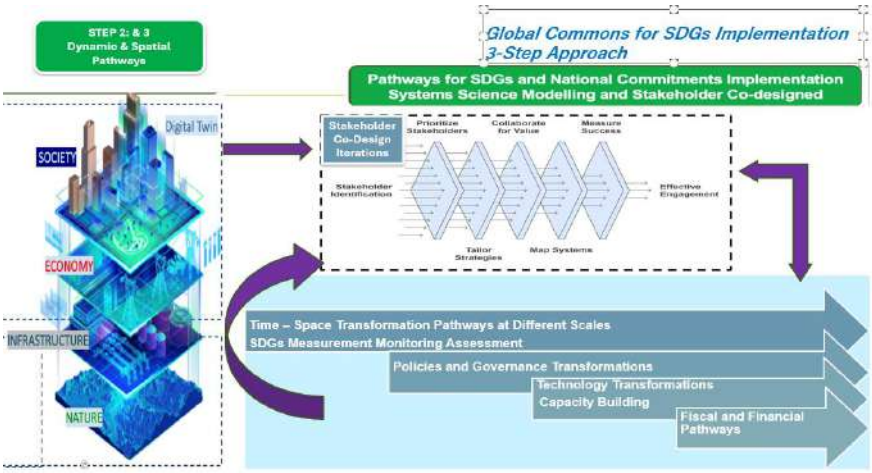

Figure 3 – The 3-step approach in practice

The Global Climate Hub (GCH) approach has already been demonstrated through several AE4RIA case studies that translate transition management theory into quantified, place-based transformation pathways. These applications show that systems innovation can be made operational, measurable, and policy ready. They utilise GCH's core principles—multi-model integration, stakeholder co-design, and open digital infrastructures—and extend them into real-world decision processes. (Let's put these success stories in boxes).

From system-wide pathways to firm-level incentives: micro-level sustainable finance as an implementation lever: A further bridge between system-wide transition pathways and real-economy transformation lies at the micro-economic level of finance. Even where governments adopt credible sustainability strategies, implementation depends on how firms, investors, and financial intermediaries allocate capital, manage risk, structure supply chains,

and disclose sustainability performance. Recent work on micro-level sustainable finance suggests that aligning corporate emissions accounting, double-materiality assessment, ESG indicators, and SDG-relevant metrics can help translate broader sustainability goals into decision-relevant signals for markets and regulators. Framed in this way, firm-level sustainable finance is not separate from the wider transformation agenda; it is one of the mechanisms through which pathways become operational, investable, and accountable. It also raises an important equity concern, since smaller firms may struggle to meet expanding reporting and data requirements unless new standards are accompanied by technical support, proportionate compliance arrangements, and open-access enabling infrastructure.

Below a list of areas I work in, using Economic Literature and Natural Sciences traditional categorizations:

1. Natural Resources (Renewable and Non-Renewable) Economics and Econometrics: Resources: Inland water (surface and groundwater) resources; Fisheries, aquaculture and oceans resources (hydrocarbons, hydrogen, winf and wave energy); Forest resources; Energy (renewable) sources; Biodiversity and ecosystem service (Ecological Economics); Land use; Recreational aspects of natural resources; Air. Pollution: Air Pollution; Water Pollution; Noise; Waste. Climate Change (and intergenerational issues).

2. Agricultural Economics: Micro Analysis of Farm Firms, Farm Households, and Farm Input Markets; Agricultural Finance; Land Ownership and Tenure; Land Use; Irrigation; Agriculture and Environment; R&D and Agricultural Technology; Biofuels; Agricultural Extension Services; Agricultural Policy; Food Policy.

3. Sustainable Development, Intergenerational Modelling, Long-Run Discounting and Cost-Benefit Analysis, unifying frameworks for short, medium and long run decision-making.

4. Uncertainty and Ambiguity, Risk and Irreversibility, Natural Disasters.

5. Benefit Valuation: Experimental Approaches, Choice Modeling, Contingent Valuation, Hedonic Pricing, Travel Cost, Benefit Transfer, Cost-Benefit Analysis.

6. Behavioral and Social Aspects: Bahavioural Economics, Experimental Economics, Consumption and Demand, Distributional Aspects.

7. Production and the Environment: Production/Cost Function; Micro-Econometrics, Production Technology Adoption and Diffusion; Processes, Production Under Uncertainty and Risk Preference Estimation.

8. Regulation and Instruments: Price-based MBI, Quantity-based MBI, Voluntary Approaches, Externalities, Other Market Failures.

9. Game Theory and the Environment.

10. Health and the Environment.

11. Interdisciplinary Approaches to Natural Resources Management and Policy.

12. Intradisciplinary Stakeholders' Participatory Approaches for Systems Innovation Co-design.

13. Innovation Incubation and Acceleration

14. Econometric Methods: Time Series, Cross-Section, Panel, Parametric/Non-parametric.

15. Philosophy of science applied to economics (general), econometrics and environmental and resource economics.

International Workshop

87. Invited Speaker to "Heineken Growth Makers Nights" ,'' Orange Grove '' ,
30 October 2018

86. Invited Speaker to Delphi Economic Forum IV entitled "Inclusive Growth". The Forum will take place in historic Delphi, Greece, a UNESCO world heritage site,from February 28th to March 3rd, 2019.

85.Invited Speaker to the "UN SDSN Black Sea Launch event", Aristotle University of Thessaloniki, 25 October 2018.
84. Keynote Speaker, Session 4: "IMPLICATIONS, ecosystem services and socio-economy", GLOBAQUA FinalConference entitled "Water river management under water scarcity andmultiple stressors" 18-19December 2018, Barcelona (Spain)

83. Lecture on " the Water Policy and Managementcourse ", 8 September 2018, Graduate School of Public Policy, Nazarbayev University, Astana, Republic of Kazakhstan

82. 1st PELAGOS Greek Hub for Blue Energy Workshop on spatial planning, Coastal Zone Management and social acceptance of MRE, Athens, 25 May 2018.
- Presentation on “Socio-economic benefits and acceptance of MRE projects”

81. Keynote Speaker, "Sustainable Development with the Co-operation of Local Communities in the area of Mainalon" Workshop organized by AE MAINALON, under the auspices of SDSN Greece, 21 April 2018, Vitina, Greece

80. Inaugural Nexus Cluster Workshop, 16 March 2018, Athens.

79. European Climate Research Alliance (ECRA) Joint Collaborative Programs Workshop on “Changes in the Hydrological Cycle & High Impact Events and Climate Change”, 9 March 2017, Brussels, Belgium.

78. GLOBAQUA Meeting: Managing the Effects of Multiple Stressors on Aquatic Ecosystems Under Water Scarcity, EC FP7 DG-Research Project (http://globaqua-project.eu/) 28-29 November 2016, ICRE8 Premises, Athens, Greece.
The scope of the meeting revolved around the integration of the work of the different work packages (WP2, WP8, WP9, WP10, WP11) with regards to different aspects of climate change scenarios that each team works on.

77. DAFNE kick off meeting: "Decision-Analytic Framework to explore the water-energy-food NExus in complex and transboundary water resources systems of fast growing developing countries", organized by ETH, 7-9 September 2016, Zurich, Switzerland.

76. GLOBAQUA (Managing the effects of multiple stressors on aquatic ecosystems with water scarcity) meeting of Steering Committee and Work Package Leaders, organized by IDAEA-CSIC, 20-21 September 2016, Barcelona, Spain.

75. SMIRES (Science and Management of Intermittent Rivers and Ephemeral Streams) Cross Working Group meeting, organized by IRSTEA, 12th September 2016, Lyon, France.

74. International Workshop on “Analytical tools to evaluate the impact of public policies on Sustainable Development Goals”, organized by Fondazione Eni Enrico Mattei, 27th September 2016, Milan headquarter, Italy. Invited chair of session on “Sustainable Development in a changing world”.

73. Lecture on “Sustainable Agriculture and Data Needs”, ATHENA Research Center in cooperation with RDA Europe project organized Wheat Community Datathon. Athena Research and Innovation Center, Athens, Greece, July, 2016

72. 1st SMIRES Management Committee (MC) meeting - Brussels, March 11th 2016

71. PRIMA Expert Group Meeting - European Commission, Brussels, 8th March 2016

70. GLOBAQUA Project (Grant Agreement no 603629), 2nd General Assembly, Managing the effects of multiple stressors on aquatic ecosystems under water scarcity Collaborative Project 13-14 January 2016.

69. Invited Speaker to Workshop on David W. Pearce: '10 Years after Pearce', London School of Economics, London, UK,10th September 2015.

68. GLOBAQUA Meeting: Managing the Effects of Multiple Stressors on Aquatic Ecosystems Under Water Scarcity, EC FP7 DG-Research Project (http://globaqua-project.eu/) 23-24 March 2015: Climate Change and Socio-Economic Scenarios Building, ICRE8 Premises, Athens, Greece.

67. 7th MERMAID meeting at Elsinor, Denmark, March 18-20th 2015
Innovative Multi-Purpose Off-Shore Platforms, Planning Design and Operation (MERMAID: http://www.mermaidproject.eu): FP7 project, EC, DG-Research Elsinor, Denmark Meeting, March 18-20th 2015.
Plenary Presentation by Prof. Koundouri: The Assessment Tool for Identifying Welfare Increasing Off-Shore Platforms.

66. Workshop on Methods and decision-making framework for a policy-driven Biodiversity in Crete
Organized by the Hellenic Centre for Marine Research (http://www.hcmr.gr/en/), Friday 20th March, Chamber of Commerce, Heraklion, Crete, Greece.
The aim of the workshop is to inform the general public, scientific and productive institutions and administration for innovative tools and new institutional frameworks that can contribute to policy making and decision-making environmental management, in light of promotion, enhancement and protection of biodiversity of Crete.
-Ecosystem Based Valuation of Biodiversity and Integration of Biodiversity Value in Policy Making

65. OpenAIREplus Final Review, 27th January 2015, Kostis Palamas, University of Athens, Athens, Greece.
- OpenAIRE Sustainability Study: The Financial Viability of the OpenAIRE European platform for Access to Scientific Information.

64. Jointed Meeting: Globaqua (Managing the Effects of Multiple Stressors on aquatic ecosystem under Water Scarcity) and MARS (Managing Aquatic Ecosystems and Water Resources under Multiple Stress), Instituto Superior Tecnico, Lisbon, Portugal,
- Identify the prevalence, interaction and linkages between stressors in multiple stressor situations: water as a central stressor

63. MERMAID Project Meeting and Workshop. 17-19, September, 2014, Bologna, Italy.
- *Socio-Economics of Innovative Offshore Platforms: A Framework of Analysis and Empirical Applications*

62. Greece and the European Union: Wind Energy and Renewable Energy Targets for 2030. Organized by the Greek Scientific Association for Wind Energy. Athens, 9 April, 2014.
- *The Ocean of Tomorrow: The Economics of Energy Production on Offshore Platforms.*

61. European Workshop on 'Socio-Economics of Innovative Offshore Platforms: A Framework of Analysis and Empirical Applications', Athens, March, 21, 2014. (Sponsor: European Commission, DG Research and Innovation)
- *Merging the Socio-economic Methodology of European Commission's Research on Multi-Use Off-shore Platform*

60. GLOBAQUA kick-off meeting, Barcelona, 18-19 Feb. 2014. Managing the Effects of Multiple Stressors on Aquatic Ecosystems Under Water Scarcity, European Commission
- *A Methodology for Implementing the Water Framework Directive in Water Scarce European Region via the Ecosystem Services Approach to Valuing Water Resources.*

59. Council Meeting of the European Association of Environmental and Resource Economics, Helsinki, 31 January, 2014.

58. OpenAIRE Workshop on Legal and Sustainability Issues, Vilnius, Lithuania, 5 November, 2013.
- *Preliminary Results of the OpenAIRE Sustainability Study*

57. GLOBAL IQ Project Workshop, Rome, 25-26 September, 2013.

56. THESUS FP7 Project Meeting, Varna, 15-17 Bulgaria, May, 2013.
- *Insurance Instruments for Extreme Climate Events*
- *Costs Benefits Analysis in Decisions Support Systems for Extreme Climate Events*

55. GENESIS FP7 Meeting, Krakow, 8-9 May, 2013.
- *Different Methodologies towards Valuing Groundwater Benefits: Results from GENESIS WP6*

54. MERMAID FP7 Project Meeting, Deltares, Delft, The Netherlands, 17-18, April, 2013.
- *Plenary on Costs Benefits Analysis of Off-Shore Platforms.*

53. European Association of Environmental and Resource Economics Council Meeting, Technical University of Istanbul, Istanbul, 1st, March, 2013.

52. MERMAID FP7 European Project Meeting, ITU, Istanbul, 24th-26thSeptember, 2012.
- *Plenary Session Lecture: Deriving Economic Values from Stakeholders Preferences.*

51. GENESIS FP6 European Integrated Project Meeting. Ferrara, Italy, 11-14 March, 2011.
- *A Choice Experiment and Distance Function Econometric Analysis Informing the Implementation of the WFD.*

50. GENESIS European Integrated Project Meeting. Zurich, Switzerland, 17 December, 2010.
- *A Choice Experiment and Distance Function Econometric Analysis Informing the Implementation of the WFD.*

49. GENESIS European Integrated Project Meeting. Valencia, Spain, 25-28 October, 2010.
- *Measuring the Value of Water in Agriculture under Climate Change Uncertainty: A Micro-econometric Analysis on Vosvozi case study.*

48. GENESIS European Integrated Project Meeting. Rokua, Finland, 28-30 October, 2010.
- *The Value of Scientific Information: A Choice Experiment.*

47. THESEUS: Innovative coastal technologies for safer European coasts in a changing climate. European Integrated Project Meeting. Leuven, Belgium, 2-4 June, 2010.
- *The Economic Valuation of the Effects of Floods: A Choice Experiment*

46. THESEUS: Innovative coastal technologies for safer European coasts in a changing climate. European Integrated Project Meeting. Venice, Italy, 9-11 December, 2009.
- *Natural Disasters and Insurance Markets*

45. Bank of Greece Workshop on Climate Change Economics in Greece. Bank of Greece, Athens, 16 March, 2010.

44. GENESIS European Integrated Project Meeting. Alexandroupolis, Thraki Palace Hotel and Conference Centre, March 22-26, 2010.
- *Cost-Benefit Analysis in the Implementation of the Water Framework Directive.*

43. European Workshop on Groundwater and dependent Ecosystems: New Scientific basis on climate change and land-use impacts for the update of the EU Groundwater Directive. 14-19 April, 2009, Istanbul, Turkey
- *Economic Methods in Revealing the anthropocentric Values of Groundwater and dependent Ecosystems*

42. Scientific Workshop on Southern European Seas: Assessing and Modelling the changes in Ecosystems. Palma de Mallorca, Spain, 1- 3, April, 2009.
- *An eco-systemic Choice Experiment on the Black Sea*

41. Scientific Workshop on Southern European Seas: Assessing and Modelling the changes in Ecosystems. Palma de Mallorca, Spain, 17-19 November, 2008.
- Revealing tourists' preferences for biodiversity: A choice experiment in Crimea
- Valuation of natural marine ecosystems: An economic perspective.

40. Invited Speaker, The Mediterranean Science Commission (CIESM - http://www.ciesm.org) Workshop on 'Economic Valuation of Natural Mediterranean Marine Ecosystems', Bodrum, Turkey, 22 - 25 October, 2008.

39. Invited Speaker, AQUASTRESS Meeting, Nafplio, Greece, 12-15 February, 2007.

38. European Workshop on Southern European Seas: Assessing and Modelling Ecosystem Changes Workshop, Anavissos, Greece, Hellenic Centre for Marine Research, 29 Noember-1 December, 2006.

37. North Atlantic Treaty Organization (NATO) Advanced Research Workshop (ARW)
- Wastewater Reuse - Risk Assessment Decision-Making and Environmental Security. (Invited Speaker), Istanbul, Turkey, October 12-16, 2006.

36. Invited Speaker, AQUASTRESS Meeting, Brussels, 28-30 June, 2006.

35. Invited Speaker, AQUASTRESS Meeting, Cyprus, 26-27 June, 2006.

34. Invited Speaker, IASON (International Action for Sustainability of the Mediterranean and Black Sea Environment) Workshop, Anavissos, Greece, Hellenic Centre for Marine Research, February 5th, 2006.
- *The Economic Valuation of Marine Resources: Methods and techniques.*

33. Invited Speaker, EROLIMPACS Workshop on Impact Evaluation of Global Change on Freshwater Ecosystems, Athens, September 5-9, 2005.
- *Using a Choice Experiment to Account for Preference Heterogeneity in Wetland Attributes: The case of Cheimaditida wetland in Greece.*

32. Invited Speaker, Workshop on 'Coping with Water Stress in Europe', University of Hannover, May 24-25, 2005.
- *Economic Valuation Methods for Efficient Water Management.*
- *Economic Instruments for Integrated Resource Management in Arid and Semi-Arid Regions.*

31. Meeting on 'The Impact of REACH on the Environment and Human Health', European Commission, DG Environment, Brussels, September 17th, 2005.
- *The impact of REACH on the environment and human health: The Economic Aspects of the Valuation of the Impact, European Commission, DG Environment.*

30. AQUASTRESS: Mitigation of water stress though new approaches integrating management, technical, economic and institutional instruments, FP6 Global change and

Ecosystems, EC Contract No 511231, Kick-off meeting, Rome, CNR & Frascati, February 2nd-4th, 2005.

29. IASON: International Action for Sustainability of the Mediterranean and Black Sea Environment, Kick-off meeting, Anavissos, Greece, Hellenic Centre for Marine Research, February 5th, 2005.

28. Invited Speaker, OECD Workshop on 'Evaluating Agri-environmental Policies', Paris, 6-8, December 2004.

27. Invited Speaker, Joint Workshop on 'Drought and Water Deficiency: from research to policy making', organized by the European Commission (DG Research and DG Environment) and France, and supported by the ARID Cluster, Palermo, Sicily, 6-9, October, 2004.
- *Valuing Water in a Watershed in the Absence of Market Prices.*

26. Invited Speaker, Science for Sustainable Marine Bioresources- Open Meeting 2 September 2004, Edinburgh.

25. World Bank GW-MATE six month progress meeting, Washington, 20-23, June, 2004.
- *The Economics of Arsenic Mitigation: A Methodology for Rapid Cost-Benefit Appraisal.*

24. Invited Speaker, World Bank Workshop on Groundwater Management, Bangon, 15-17, November, 2004.
- *The Economics of Groundwater Management.*

23. Invited Speaker and Working Group Leader in International Workshop on 'Valuing the Biological Diversity of Crops in a Development Context' with the support of BIOECON and FAO, March 29 – 30, 2004, Rome, Italy.
- *Econometric Techniques for Valuing Biodiversity.*

22. Invited Speaker, International Workshop on 'Valuing European Wetlands', March 7-12, Innsbruck, Austria.
- *The Contingent Valuation Methods for Estimating Monetary Values for Marginal Wetlands.*
- *The Land Use Allocation Model: Theory and Application to the UK.*

21. Invited Speaker in World Bank Workshop on 'Arsenic Contamination in South Asia and East Asia Regions – Extent and State-of-the-Art Knowledge', January 2003, World Bank Headquarters, Washington, USA.
- *The Economics of Arsenic Mitigation.*

20. Invited Speaker in Stakeholder European Workshop on 'Impact Assessment of REACH', November 21, 2003, European Commission, Brussels, Belgium.
- *The Social Cost of Chemicals: An Economic Evaluation of the EU Chemicals Directive.*

19. Invited Speaker for the 3rd MEDIS European Workshop 'Towards Sustainable Water Use on Mediterranean Islands: Addressing Conflicting Demands and Varying Hydrological, Social and Economic Conditions'', October 30-31, 2003, Heraklion, Crete, Greece.
- *Economics of Water in the European Union: Problems, Principles and Policies.*
- *ARID Cluster: Results and Future Research Priorities.*

18. Invited Speaker for the 3rdWaterStrategyMan European Workshop on 'Developing Strategies for Regulating and Managing Water Resources and Demand in Water Deficient Regions', October 8-10, 2003, Paris, France.
- ARID Cluster: Results and Future Research Priorities.

17. Invited Speaker for the European Workshop on 'Advanced Project Interactions in Catchment Modelling', September 16-17, 2003, Amsterdam, The Netherlands.
http://www.harmoni-ca.info/~pclaeys/WorkDirHarmoniCA/WSCatchMod.html
- *Integrated Water Management in Arid European Regions: Synergies among European Projects.*

16. Invited Speaker for SUSTAINIS European Commission Advanced Training Course on 'Sustainable Use of Water on Mediterranean Islands: Conditions, Obstacles and Perspectives', 27th September - 12th October 2003, Ayia Napa, Cyprus.
- *'Design and Implementation of an Integrated Water Management Approach'.*

15. Invited Speaker in 'Groundwater Management for Bank Operations Training Course', September 3-5, 2003, World Bank Headquarters, Washington, USA.
'The Economics of Groundwater Management'.

14. Fourth BIOECON European Workshop on The Economics of Biodiversity and Conservation, August 28-29, 2003, Venice, Italy. http:/www.feem.it/bioecon
'Multi-Output Distance Function for the North Sea Beam Trawl Fishery'.

13. Invited Speaker for the European Workshop on 'Vulnerability of European Ecosystems Facing Increasing Drought Risk', April 10-12, 2003, Samos, Greece. http://www.pik-potsdam.de/avec/avec_droughts.html
Relevant report can be downloaded from: http://www.pik-potsdam.de/avec/figures/samos
- *Irrigation Water Management Under Risk: An Application to Cypriot Agriculture'.*

12. Invited Speaker for the Seminar on The Economics of Fisheries, Department for Environment, Food and Rural Affairs, February 2003, London, UK.
- *Multi-Output Distance Function for the North Sea Beam Trawl Fishery.*

11. 'From Economic Research to Development Policy', December 11, 2003; organized by DFID (Department for International Development) and CEPR (Center for Economic Policy).

10. GREENPEACE Business Lecture with Margot Wallstrom, EU Environment Commissioner: 'The New EU Environment Agenda: Chemical Legislation and Beyond', Monday, 13 October

2003, Royal Society of Arts, London WC2. (I received a special invitation for this lecture as the EU Commissioner referred in his speech to the results of my research project on '*The Social Cost of Chemicals: An Economic Evaluation of the EU Chemicals Directive'*)

9. European Workshop 'Aquallibrium: European Water Management between Regulation an d Competition', November 2002, Berlin, Germany.
- *An overview on the current debate and analysis of the various models of involvement and co-operation between the public and the private sector in the Republic of Ireland.*

8. Invited Speaker for 2nd MEDIS European Workshop 'Towards Sustainable Water Use on Mediterranean Islands: Addressing Conflicting Demands and Varying Hydrological, Social and Economic Conditions', October 2002, Majorca, Spain.
- *Introducing the ARID Cluster: Strengthening complementarity and exploitation of results of related RTD projects dealing with water resources use and management in arid and semi-arid regions.*

7. Invited speaker for 2nd AQUADAPT European Workshop '*Strategic Tools to Support Adaptive, Integrated Water Resource Management Under Changing Utilisation Conditions at Catchment Level: A Co-Evolutionary Approach*', October 2002, Montpellier, France.
- *Introducing the ARID Cluster: Strengthening complementarity and exploitation of results of related RTD projects dealing with water resources use and management in arid and semi-arid regions.*

6. The ARID Cluster European Workshop, July 9th 2002, Hermoupolis, Syros, Greece.
- *Integrating the Arid Cluster. The new Accompanying Measures Project, Objectives and actions in the project; Implications of the Accompanying Measures activities on the Arid Cluster.*

5. Invited Speaker for European Workshop on Externalities: Building up the RED Database for Sustainable Development Strategy Support, 17th June 2002, European Commission – Belliard 100, SDR 0/0, Brussels, Belgium.
- *An Economic Methodology Towards Full-Cost Recovery: Water.*

4. Invited Speaker for the Seminar on Water Management, December 2001, European Institute of Public Administration, Maastricht, The Netherlands.
- *Towards an Integrated Water Management in Cyprus: Methodology and Application.*

3. Invited Speaker for the European Workshop on 'Water Management and the European Union', October 2001, European Commission, Brussels, Belgium.
- *Different Methodologies to Measuring Water Scarcity.*

2. European Workshop on Integrated Water Management, March 2000, Institute for Transnational Legal Research, Maastricht University, Maastricht, The Netherlands.
- *Hedonic Price Analysis and Selectivity: Theory and Application to Groundwater as Productive Input*.

1. Workshop on 'Integrated Water Management', July 1999, Department of Economics, University of Cyprus, Nicosia, Cyprus.
- *The Potential for Groundwater Management: Gisser-Sanchez's Result Reconsidered*.
- *Dynamic Adaptation to Resource Depletion with Backstop Technology: A Partial Resolution of the Gisser-Sanchez Effect*.

Seminar Presentations, Invited by:

47. "Beyond GDP: A Global Commons for Accelerating Sustainable Development on a Finite Planet," Grantham Centre for Sustainable Futures at the The University of Sheffield as part of its Rethinking Prosperity on a Finite Planet seminar series. 10/26

46. Department of Earth Sciences, Cambridge University seminar titled "A Systems Approach to Sustainability Transformation: Science-Based and Stakeholder Co-Designed Solution Pathways." 11/24

45. European Junior Water Programme masterclass focused on "The future we want: SDG-based Investments" - Training Week, 10/22

44. Black Sea High Tech Summit to present the AE4RIA Maritime accelerator as enabler for the development of a sustainable Blue economy, in Varna (Bulgaria) on 27 and 28 September 2022.

Taught Courses

Athens University of Economics and Business 2005-today

-Environmental Economics: Course Convenor, Department of International and European Economic Studies, AUEB (2005 – today)
-Intermediate Econometrics / Econometrics II: Course Convenor, Department of International and European Economic Studies, AUEB (2005 – today)
MSc Energy Law and Economics, Deputy Director (2019 - today)
-Environmental and Natural Resource Economics, Lecturer, MSc in Law and Economics in Energy Markets
-Modeling Energy, Environment and Economy, Lecturer, MSc in Law and Economics in Energy Markets
-Special Topics on Energy Policy: Co-Lecturer, MSc in Law and Economics in Energy Markets
-Sustainable Development and Limited Carbon Economies: Lecturer, MSc in Law and Economics in Energy Markets
-Environmental and Resource Economics, Lecturer, MSc in International and European Economic Studies
- Course Convenor: Energy Economics (MBA International)
-Course Convenor: Intermediate Econometrics (2nd year compulsory undergraduate, 2005-2014)
-Course Convenor: Project Evaluation and Cost Benefit Analysis (optional undergraduate, 2008-2012)
- Environmental Economics and Valuation (MSc optional course, 2008 -2013)
- Course Convenor: Economic Dynamics (compulsory PhD program, 2005-2006)
- Course: Panel Data Econometrics (compulsory PhD program, 2005-2007)
- Course: Applied Econometrics (optional undergraduate, 2005-2007)
- Course: Advance Microeconomics (compulsory postgraduate, 2005-2007)
- Course: European Environmental Policies (optional postgraduate (executive), 2005-2009)
- Supervisor of undergraduate and post-graduate dissertations (2005-2008)
